Al-Ḡāḥīz is one of the ʿAbbāsid era’s most celebrated bibliophiles, and his praise of books and championing of ‘writerly culture’ in 3rd/9th-century Iraq are well documented. However, he also expressed distinctly negative appraisals of books that have hitherto received much less scholarly attention. This paper will examine the curiously paradoxical views of al-Ḡāḥīz by considering his opinions on non-Arabic books in the context of scholarly debates in his contemporary Iraq. Al-Ḡāḥīz’s conception of such books intersected debates regarding (a) the suitability of books to transmit knowledge, (b) rivalries between Arabs and non-Arabs in early ʿAbbāsid Iraq, and (c) the merits of translating scholarly writings from pre-Islamic civilisations. Al-Ḡāḥīz’s opinions on these issues led him to develop a particular conception of the ‘perfect book’ whereby he could unreservedly praise his own writings and extol ʿAbbāsid literary culture, but at the same time subordinate foreign literary cultures to the non-literate pre-Islamic Arabians. Al-Ḡāḥīz’s theories reveal that 3rd/9th-century Iraq had not yet become entirely a ‘civilisation of the book’, and that conceptions of language, ethnicity and knowledge influenced the formation of Muslim bibliophila.

In the wake of the Islamic conquests of the 1st/7th century which amalgamated the various pre-Islamic civilisations of the Near East and Mediterranean into one empire, and with the subsequent emergence of Arabic as the region’s new lingua franca of cultural production, scholars in early ʿAbbāsid Iraq (mid 2nd/8th to 3rd/9th centuries) experienced an environment responding to significant social and cultural change. From the later 2nd/8th century, the intellectual status quo was also confronted by technological developments which made the production of relatively inexpensive paper possible and facilitated a hitherto unprecedented opportunity for commercial book publication. Scholars who formerly had relied largely on the aural acquisition of knowledge via lectures now could study from a growing library of books and disseminate their research and ideas to a wider reading public. The unique advantages of books to store and transmit knowledge were apparent to 3rd/9th-century

1 See J. Bloom Paper before Print, discussed below, note 65.
intellectuals who praised writing specifically for this ability to communicate across time and space in ways that the oral/aural teacher/student relationship was physically unable to match.\(^2\)

Akin to many such momentous epistemological and technological changes throughout history, the introduction of books and the integration of various ethnicities into the new social order of the 3rd/9th century were controversial and stimulated spirited debates which propelled Muslim civilisation along new trajectories. From the 4th/10th century, these eventually led to the bibliophilia and cultural unity for which medieval Muslim civilisation is famous.\(^3\) But in the 2nd/8th and 3rd/9th centuries, scholars were in the midst of debate over whether a mute, inanimate book could sensibly replace a speaking, living lecturer as an authoritative source for knowledge, while the different ethnicities of the Muslim world vigorously jostled for status.\(^4\) These discourses collided with a third intellectual challenge when Arabic-speaking scholars began to translate and reflect on the books of Greco-Roman, Sāsānid Persian, Indian and other pre-Islamic cultures.

The ‘translation movement’, which began in the early 2nd/8th century (perhaps even before),\(^5\) made Arabic translations of pre-Islamic

---

\(^2\) See, for example, the praise of ḫatt (writing) in both al-Ǧāḥiz’s R. al-Mu‘allimīn (Rasā’il, 3: 27), and Hayawān (1: 49–52).

\(^3\) Regarding the cultural bibliophilia, S. Toorawa identifies the late 4th/10th century as a time when ‘reliance on books would become pro forma’ (Ibn Abī Ṭāhir, 24). This was the period of Ibn al-Nadīm, whose lengthy Fihrist stands as a monument to the writerly culture of his generation. The cultural unity of the medieval Islamic world is well known, neatly encapsulated by a verse Badīʿ al-Zamān al-Hamādānī composed for his al-Maqāma al-ʿilmīyya (Maqāmat, 203):

Alexandria is my home, Should I settle there;
But in Syria I spend the night, and in Iraq, my day.

\(^4\) Extant evidence for the controversies surrounding these debates can be adduced from bans on selling certain books in 279 and 284 reported in al-Ṭabarī (Ṭārīḵ, 10: 27, 54) (also discussed by S. Toorawa Ibn Abī Ṭāhir, 20); the heated debate over writing Islamic traditions (M. Cook ‘The Opponents’); and the discordant pro-Arab/anti-Arab Šuʿubiyya-style polemics so commonly encountered in 3rd/9th century adab texts, including those of al-Ǧāḥiz. L. Behzadi’s summary is apt: ‘ongoing discourses of [al-Ǧāḥiz’s] time must have been much more colourful than we usually assume’ (Sprache und Verstehen, 175).

\(^5\) Traditionally, the translation movement has been associated with al-Maʿmūn (r. 198/813–218/833), but more recently, scholars have identified the urge to absorb and translate foreign knowledge from an earlier date, during the caliphates of al-Maṣūr (r. 136/754–158/775 and Hārūn al-Rashīd (r. 170/786–193/809), and perhaps the late Umayyad period (R. Rashed, ‘Greek into
scholarly texts widespread by the early 3rd/9th century. The translated texts differed starkly from the nascent Islamic sciences and Arabic philology, not only in terms of content, but also in form. Significantly, the translated texts were rooted in a manuscript tradition that contrasted with the Islamic and Arabic sciences where aurality was asserted as a key component of authority and authenticity. Furthermore, they were originally written in the distant past and in non-Arabic languages by peoples with neither geographical connection to Arabia, nor temporal proximity to Islamic history.

Muslim scholars in the late 2nd/8th and 3rd/9th centuries thus simultaneously confronted issues of integrating diverse intellectual traditions of the Near East, theorising the acceptability of books as a means of transmitting knowledge, and accommodating multiple ethnicities into their social order. I suggest that these debates were interrelated and led 3rd/9th-century writers to adopt ambivalent positions which can be seen as steps on the way towards the more defined literate, bibliophilic and culturally inquisitive outlook of subsequent centuries. On the one hand, the budding bibliophilia of the 3rd/9th century would aid the favourable reception of both Arabic books and translated ‘pre-Islamic’ manuscripts, but the tensions inherent in the process of Arabicising a multi-ethnic society thrust non-Arabic writings into debates about how the polyglot heritage of the Muslim civilisation should be navigated. This paper will explore the way in which the Iraqi polymath, ‘Amr ibn Bahr al-Ǧāḥiẓ (d. 255/869) conceptualised ‘the book’ in the context of his views on non-Arabic peoples and the production of knowledge. Al-Ǧāḥiẓ may not be a squarely ‘typical’ scholar of his time, if such a notion should indeed exist, but his writings on these debates are extensive and demonstrate their interrelatedness.

---

6 ‘Foreign books’ commonly encountered in 3rd/9th century Arabic literature are Greek mathematical, scientific and philosophical writings, Sāsānid Persian historical and legendary court literature and collected aphorisms of a devotional and philosophical nature from Sāsānid Persia and India.

7 S. Toorawa criticises the trend in modern scholarship to identify al-Ǧāḥiẓ with the ethos of the 3rd/9th century (Ibn Abī Tāhir, 124–7), however, I believe it may be difficult to ascribe to anyone the attributes of a ‘standard’ citizen of
Al-Ǧāḥīz was a prolific writer and avid reader, identified in both medieval and modern writings as one of Islam’s most famous bibliophiles. Some later biographers even reported that books caused his death, crushing him around his ninety-fifth year under a collapsed bookcase! But in contrast to reports of his bibliophilia, al-Ǧāḥīz himself expressed ambivalent opinions on the utility of books. On the one hand, his well-known love of knowledge seems to have engendered his respect for books as vital carriers of knowledge and led him to adopt a markedly bibliocentric view of the world, whereby he appraised foreign peoples in correlation with their book production. This facet of al-Ǧāḥīz has been often cited in modern scholarship, but little attention has been given to a paradoxically contrary trend in his writings where he expressed doubts about books as symbols of knowledge and societal achievement, and even disparaged books and ‘foreign book-producing’ peoples. Resolving the contradiction of al-Ǧāḥīz’s ambivalent

---

8 According to Ch. Pellat, (‘Nouvel essai’, 119), he wrote 245 works. Many are better described as epistles, running some dozens of pages or less, though others are firmly ‘books’ in the ‘modern’ sense (G. Schoeler, ‘Writing for a Reading Public’, 52–3, 62–3): stand-alone texts with a set structure, and two in particular, al-Hayawān and al-Bayān wa-l-tabyīn have survived in multi-volume works.

9 Yāqūt relates the statement of Abū Hīffān: ‘I have neither seen nor heard of anyone who loves books and the fields of knowledge more than al-Ǧāḥīz’ (lām ara qaṭṭu wa-lā samī’u man aḥabba l-kutuba wa-l-ʿulūma akṭara mina l-Ǧāḥīz; Mu’jam, 4: 474). See also al-Masʿūdī (Muḥḥ al-qahab, 5: 104) and Ibn al-Nadīm (Fiḥrist, 130, 208). Al-Ǧāḥīz’s love of books is almost universally cited in modern writings about him, see Ch. Pellat ‘al-Ǧāḥīz’ on his wide readings; N. Anghelescu for his status as champion of literate culture (Langage et Culture, 63); and more generally S. Günther ‘Praise to the Book!’.

10 This famous but apocryphal-sounding account of his death is reported in Ch. Pellat The Life and Works, 9. Neither al-Ǧāḥīz’s nor Yāqūt’s biographies of al-Ǧāḥīz mention it, recording instead that al-Ǧāḥīz was in his ninety-sixth year around the time of his death and that his physical condition was extremely poor, suffering from semi-paralysis (fāliğ) and gout (niqris), and thus not likely in a fit state to browse bookshelves in his last days (al-Baghdādī, Tārīḫ, 12: 214, Yāqūt, Muʿjam, 4: 492, 496–8).

11 See, particularly N. Anghelescu Langage et Culture and S. Günther ‘Praise to the Book!’.
bibliophilia must take into account the developing ‘writerly culture’
and conceptions of ‘foreign peoples’ in his contemporary Iraq. His
writings highlight how the hallmarks of the medieval Islamic civilisation –
bibliophilia, knowledge-seeking and a cosmopolitan outlook – were
closely interrelated, though not definitively conceptualised, during the
first ‘Abbāsid century.

Interpreting al-Ǧāḥiz on ethnicity: a scholarly advisory
Akin to other volatile substances, analysis of al-Ǧāḥiz must come with
appropriate caveats. He has been described as sarcastic, witty, rambling,
emotive, unsystematic and elusive, more lyrical than meticulous, 13
neatly summarised by one modern scholar: ‘who is to say what [al-
Ǧāḥiz’s] true intentions are – perhaps not even [al-Ǧāḥiz] himself’. 14
Al-Ǧāḥiz makes strong arguments, though his opinions can appear to shift
from one text to the next, leading readers to question whether he
possessed strong opinions at all, or whether his ambivalence is a mixture
of his own confusion and/or scholarly interest in debating multiple, and
conflicting angles of an argument. As such, al-Ǧāḥiz’s work does not lend
itself to macrosynthesis of anecdotes from his vast oeuvre. Rather,
each quotation demands microanalysis to infer its meaning in the context
of the text in which it is contained. 15 Despite these difficulties, I concur
with some modern opinions that al-Ǧāḥiz may be more systematic than
traditional Western research has assumed. 16 Nonetheless, the
complications of al-Ǧāḥiz are manifold and evident in his discussions of
books and ethnic groups which are the focus of this paper. As for peoples
of the world, in some cases we find al-Ǧāḥiz praising the merits of a
people, while in a different text he sharply lampoons them. 17 Political

12 An appropriate term for the increasingly textual, book based approach to
scholarly activity coined by S. Toorawa, Ibn Abī Ṭāhir (1) to describe the adab
culture of the 3rd/9th and succeeding centuries.
13 See S. S. Agha, ‘Language as a Component of Identity’, 70–3, 80. See
also S. Enderwitz, ‘Culture History and Religion’, 229.
14 An opinion expressed by J. Lassner, The Shaping, 121.
15 This approach to al-Ǧāḥiz was proposed by S.S. Agha (‘Language as a
Component of Identity’, 72–3) and is mirrored in J. Montgomery’s three-fold
strategy to extrapolating meaning from a given Ǧāḥizian text (‘Speech and
16 J. Montgomery, borrowing from Isaiah Berlin, alludes to al-Ǧāḥiz’s
‘despotic [intellectual] system’ (‘Speech and Nature. Part 3’, 114), and Behzadi
considers al-Ǧāḥiz a ‘systematic’ thinker (Sprache und Verstehen, 173).
17 For example, in al-Bayān wa-l-tabyīn al-Ǧāḥiz denigrated the Zanj (a term
particularly used to describe East Africans who arrived in al-Ǧāḥiz’s Iraq as
agendas and patronly tastes may have coloured al-Ḡāḥiz’s analysis in particular epistles; 18 and we ought to exercise further caution in interpreting his texts at face value, for, in addition to the sarcasm and tongue-in-cheek sometimes apparent in his style, al-Ḡāḥiz wrote in polemical genres which fostered exaggeration and embellishment at the expense of sober discourse.

It has been noted that al-Ḡāḥiz was singularly influenced by discourses emanating from the genre al-Maḥāṣin wa-l-Masāwī’ (good versus bad traits) which used dialectic as a means of analysis whereby everything is imagined to be relative and all ideas could be called into question. 19 Gériès has suggested how al-Ḡāḥiz used this methodology to good effect in his theological writings 20 and it appears that al-Ḡāḥiz may have engaged in a similar logic regarding ethnicities. He is known to have written several contradictory pieces about peoples of the world: consider for instance a (now lost) work in praise of the South Arabian Qaṭṭān tribal group 21, and an antithetical text praising the specific merits of their rivals, the North Arabian ‘Adnān over Qaṭṭān. 22 Al-Ḡāḥiz’s slaves) as ‘disorganised rabble’ (Bayān, 1: 137) and belittled their condition vis-à-vis other peoples (Bayān, 1: 384). In a separate, polemical essay entitled Faḥr al-sūdān ‘alā l-bīdān, however, he argued their merits, describing the Zanj in entirely positive terms (Rasāʾīl, 1: 173–226, particularly 195–9).

18 Noted by J. Lassner regarding Manāqīb al-Turk (Virtues of the Turks) which al-Ḡāḥiz dedicated to the powerful Turkic wazīr al-Faṭḥ ibn Ḥāqān (Rasāʾīl, 3: 163; J. Lassner, The Shaping, 119–120); and Pellat proposed that al-Ḡāḥiz’s al-Radd ‘alā al-naṣārā (Rebuttal against Christians) was written for the Caliph al-Mutawakkil during a period of official anti-Christian sentiment (Le Milieu Bayrīdīn, 231).

20 Ibid.

21 In 3rd/9th-century Arabic writings, Qaṭṭān was identified as the legendary ancestor of all Southern Arabs (tribes who claimed a Yemeni origin). A rivalry between ‘Northern’ and ‘Southern’ Arabs fueled polemical treatises which tend towards a binary division of Arab tribes into these two groups. Qaṭṭān and ‘Adnān became virtual by-words for these two-halves of the Arab people.

22 Rasāʾīl, 1: 225. See also his Faḥr al-sūdān which defends the merits of al-Sūdān (lit. ‘the blacks’ from sub-Saharan Africa), but also contains a condescending approach and reserved praise: for example he concedes that African slaves in Iraq lack intelligence, but ascribes this to their status as slaves and their origin from a part of Africa where people are ‘devoid of beauty and sagacity (jamāl wa-uqūl). Al-Ḡāḥiz ‘promises’ that in other parts of Africa, beautiful and more cultured peoples (jamāl wa-kamāl) could be found (Rasāʾīl,
ambivalence may thus represent his method for achieving a deeper understanding of his subject matter.

Notwithstanding the twists and turns of al-Ǧāḥiz’s views on ethnicity, Lassner made an important observation regarding al-Ǧāḥiz’s epistle Manāqib al-Turk (Virtues of the Turks). He ventured that a search for compatibility between the disparate elements of ʿAbbāsid society lay at the root of al-Ǧāḥiz’s writings on foreigners whereby al-Ǧāḥiz attempted to devise an integrating model in which non-Arabs, including al-Ǧāḥiz himself, could find a place in the social order.23 The desire to formulate an integrating model certainly accords well with the trend in ʿAbbāsid civilisation towards constructing a less divided social order. But the issue is more complex: as Pellat noted, al-Ǧāḥiz considered himself ‘very much a member of the Arab community’ and a ‘passionate defender of the Arab heritage’.24 Hence, al-Ǧāḥiz’s interest in merging various ethnicities into one social order, or perhaps a ‘cultural order’ unified by adab, conflicted with an Arabian particularism in his writings. As discussed above, issues of ethnicity, knowledge extracted from non-Arabic sources and the authoritativeness of books were being debated simultaneously in al-Ǧāḥiz’s Iraq and al-Ǧāḥiz’s conflicting leanings regarding different peoples of the world interact closely with his paradoxical opinion of books.

‘Foreigners’ and ‘foreign books’ in al-Ǧāḥiz’s writings
In the shadow of the burgeoning translation movement in 3rd/9th-century Iraq, the interplay of books and ethnicity in al-Ǧāḥiz’s thought coalesce in his writings about ‘foreigners’. His conceptions of ethnicity and the relationship between ‘peoples’ of the world (whom al-Ǧāḥiz generally labels umma)25 are complex and worthy of deeper study,26 but

1: 211–12).

25 Al-Ǧāḥiz generally designates umma as the largest distinct grouping of a people. The basis upon which Al-Ǧshiz conceived ummas to be distinct is not always apparent, but his hierarchy of terminology which identifies umma as the largest group can be found in Manāqib al-Turk (Rasā’il, 3: 213). See also his usage of umma to distinguish the Kurds, Berbers, Africans, etc (Bayān, 1: 137); or to connote the constituent ‘peoples’ of the world generally, Bayān, 3: 12.
26 Al-Ǧāḥiz’s opinions on ethnicity have been considered by modern scholars in varying degrees of detail. In addition to J. Lassner’s study of Manāqib al-Turk, Pellat considers some of al-Ǧāḥiz’s reactions to his multi-ethnic milieu (Le Milieu Baṣrien, 224–234) and ‘foreign literature’ in ‘Ǧāḥiz et
for our purposes, a brief outline of al-Ǧāḥiz’s conception of his community and the ‘outside world’ indicates how his worldview was in part formed through a ‘bibliocentric lens’.

Common to any analysis of identity and foreignness, al-Ǧāḥiz’s actual genealogy (which may have been black African (aswad) or at least not Arabian) is less of a concern than the community to which he expressed his belonging and upon which he based his conception of the ‘outside world’. The answer to this is nuanced. Al-Ǧāḥiz was certainly a partisan of the Arabs and took up their defence against those whom he called šuʿābīs (his contemporaries who lauded the past glories of non-Arabian pre-Islamic peoples and argued for their superiority over the Arabs). But he usually refrained from identifying his own community as generically ‘Arab’. At times, al-Ǧāḥiz divides the ‘Arabs’ temporally and geographically into pre-Islamic (gāhiliyyūn), Islamic (islāmiyyūn), desert-dwelling (badawīyyūn) and settled (ḥadariyyūn). These distinctions separate al-Ǧāḥiz’s generation of urban Arabic speakers in both time and space from the ‘pure Arabs’ (al-aʿrāb al-ḫullas) who inhabited desert spaces in pre-Islamic and early Islamic times. Al-Ǧāḥiz usually identifies his contemporary community as ‘us’ (nahnu), ‘this nation’ (ḥādithi al-umma) or ‘our religious community’ (millatunā). In debates with šuʿābīs, al-Ǧāḥiz does assume the position

la littérature comparée, although in the latter article Pellat does not discuss the parameters of ‘foreignness’, assuming that al-Ǧāḥiz treats the Persians, Greeks and Indians as foreign peoples. See also S. Enderwitz, ‘Culture History and Religion’ for al-Ǧāḥiz’s view on foreigners and adab culture.

27 On his non-Arabian origins, see Š. Dayl (al-Fann wa-l-Maḏāhibahu, 154) and for mention of his ‘aswad’ roots see al-Bagdādi (Ṭāriḥ Baǧdād, 12: 209), Yāqūt (Muʿgam, 4: 473). On the other hand, ‘A. Arḥifa defends al-Ǧāḥiz’s Arabian origins (al-Kitāb, 29).

28 Bayān wa-l-tabyīn in particular refers to these partisans of pre-Islamic, non-Arabian peoples as al-šuʿābiyya (see 1: 383; 3: 5, 29, 31, 89).

29 Bayān, 1: 9.

30 Bayān, 3: 29.

31 See Bayān, 1: 384 where he uses the expression ‘arab al-gāhiliyya wa ṣadr al-islām to describe the first Arabs, as historically distinct, though related to those whom he calls in the same passage ‘our community’ (ummatunā).

32 E.g., Bayān, 3: 366, where he refers to the ‘Abbāsid caliphs as ‘our caliphs’ (ḥuṣafūʿumā).

33 Bayān, 1: 368.

34 Bayān, 1: 137. For the translation of milla, see Ibn Manzūr, Lisān (11: 631) where it is defined as dīn wa-ṣarīʿa (‘religion and religious law’) and al-Ḥallī, ʿAyn (8: 324) where it is related specifically to the communal religious
of ‘the Arab’, but his general reticence to label his community as simply ‘Arabs’ is evident and logical given the diverse ethnic backgrounds in 3rd/9th century Iraq. Thus, al-Ǧāḥiz’s umma could perhaps be considered Arabised without being Arabian, maintaining a link to the ‘aʿrāb’ Arabians to the extent of its preservation of their ‘correct’ Arabic language. The maintenance of ‘proper Arabic’ emerges in al-Ǧāḥiz’s writing as the privilege of scholars, betraying an intellectual elitism, much remarked upon in modern literature.

In brief, this restricted his community to the educated ‘reading public’ and he expressed little regard for the uneducated, and even less for the group he labelled ʿārīb: inarticulate Arabic speakers of vile origin. Al-Ǧāḥiz’s ‘us’ accordingly connotes a narrow band of literate, educated, Arabic speakers who inhabited the urban centres of the Muslim world and share ‘our religious community (milla), our religion (dīn), our language, our education/manners (adab), and our ethics (ahlāq). Ties of religion, language, education and ethics appear more determinative than strict genealogy.

In terms of the rest of humanity, al-Ǧāḥiz often presents a two-fold

---

35 See, for example, his hypothetical dispute with the šuʿūbā where he and the Arabs are addressed collectively with the second person plural pronoun, antum (Bayān, 3: 14).

36 By the term ‘Arabian’ I intend the Arabic-speaking peoples who inhabit the area now identified as the Arabian Peninsula. They are to be distinguished from Arabic speakers of the urban centres of the ʿAbbāsid period. The urban Arabic speakers were also aware of this difference, commonly (although not exclusively) applying the term ‘arāb to connote the desert-dwelling Arabs. To use al-Ǧāḥiz’s terminology, I mean by ‘Arabians’, al-Ǧāḥiz’s badwaiyyūn of the pre-Islamic and Islamic periods. The ‘long-standing integration’ of non-Arabians like al-Ǧāḥiz into an Arabised identity is discussed in Ch. Pellat, Le Milieu Baṣrien, which Pellat considers the cause for the non-Arabian al-Ǧāḥiz to side with Arabians in contemporary racial debates (53–5).

37 Bayān, 1: 145. The full text is translated below at note 147.

38 See, for example, J. Montgomery, ‘Speech and Nature. Part 3’, 112, 118–19.

39 Identified by Toorawa as ‘landlords, landowners, merchants, entrepreneurs, judges, jurists, physicians, poets, littérateurs, teachers and other scholars’ (Ibn Abī Tayfār 1-2).

40 For example, his definition of ‘general populace’ (al-ʿawāmm) even explicitly excludes farmers, market sellers, tradesmen and the hishwa (‘lowlifes’), Bayān, 1: 137.

41 Bayān, 1: 146.

42 Bayān, 1: 137.
division of ummas. He explicitly identified only four ‘noteworthy’ (maḏkūr) peoples of the world: ‘Arabs’ (perhaps he means particularly Arabs from pre-Islamic up to Umayyad times43), Persians, Indians and the Rūm.44 He cast the rest as ḥamaḡ aw mā yuṣbih al-ḥamaḡ (‘disorganised rabble to varying degrees’).45 Al-Ǧāḥīẓ’s restricting of praise to these four peoples mirrors his approach to his own community and demonstrates a pivotal role of the ‘book’ in shaping his worldview. Al-Ǧāḥīẓ explains that his appraisal of world peoples was determined on an intellectual basis, declaring the above quartet as worthy of his esteem. Al-Ǧāḥīẓ’s restricting of praise to these four peoples mirrors his approach to his own community and demonstrates a pivotal role of the ‘book’ in shaping his worldview. Al-Ǧāḥīẓ explains that his appraisal of world peoples was determined on an intellectual basis, declaring the above quartet as worthy of his esteem.

43 He notes that the Umayyads preserved the praiseworthy traditions and qualities of the pre-Islamic Arabs, whilst al-Ǧāḥīẓ remarks that these traditions suffered a decline during the ‘Abbāsid period. As such, the ‘Arabs’ are relatively historically remote in much of al-Bayān wa-l-tabyīn and many of the more excellent aspects of their culture seem, in al-Ǧāḥīẓ’s view, to have passed (Bayān, 3: 366-367).

44 Bayān, 1: 137, see also Bayān, 1: 384, Ḥayawān, 1: 53. The term ‘Rūm generally designates contemporary Byzantines in Arabic texts, but can also refer to the Greco-Roman civilization. What we refer to today as the Ancient Greek civilization is usually identified as al-Yūnān. However, there is occasional overlap in Arabic writings of the 3rd/9th and 4th/10th centuries where the relationship between Rūm and Yūnān were variously interpreted, sometimes al-Yūnān were deemed as descended from al-Rūm. Al-Mas‘ūdī helpfully summarises the various opinions and notes how the later al-Rūm lived in the same lands as al-Yūnān and adopted their language and ways (madḥhab) (Murūj 2: 664). Al-Ǧāḥīẓ cites al-Yūnān as a ‘disappeared peoples’ (umma bā‘ida) (Bayān 1: 188), although in his epistle al-Radd ‘alā al-Nāṣārā, both al-Rūm and al-Yūnān are cited, indicating a perceived continuity between these two peoples in his worldview.

45 Bayān, 1: 137, Hamaḡ derives from flies or gnats which cluster around sheep and donkeys (Ibn Manẓūr, Lisān, 2: 393). It is applied to people by analogy on account of the diminutive size of gnats and disorganisation of their flight (ibid, al-Zamaḥṣārī, Asās al-Balāgha, 706). Rabble or riffraff could act as translations.

46 They are described as al-umam allatī fihā l-ḥlāq wa-l-ʿādāb wa-l-ḥukm wa-l-ʿilm (Bayān, 1: 384).

47 Bayān, 1: 88.

48 Bayān, 3: 13, Ḥayawān, 1: 53.
As regards the outside world, therefore, al-Ǧāḥiẓ adopted a distinctly bibliocentric lens by which ‘foreign’ book producing peoples were accepted to join the ‘Arabs’ in the global hierarchy, while those whom al-Ǧāḥiẓ believed lacked literary traditions were excluded. Precisely why ‘the book’ could be utilised as an arbiter between madhkūr (worthwhile’) and hamaj (‘worthless’) peoples and the precise workings of this worldview in al-Ǧāḥiẓ’s writings, can be understood in the context of the conceptions of books and knowledge in al-Ǧāḥiẓ’s society.

The nexus of ‘book–knowledge–civilisation’ in Muslim thought

Al-Ǧāḥiẓ’s ‘intellectual elitist’ worldview indicates a profound respect for knowledge (ʿilm) and a conceptualisation of books (kutub) as representing physical embodiments of ʿilm.49 The three ‘foreign’ peoples, qua book producers, generated ʿilm and so earned the right to exist alongside the Arab whose ʿilm al-Ǧāḥiẓ vigorously defended in his writings. This seems to harbinger a model of ‘universal bibliophilia’ encountered in later medieval Arabic writing where literary output and the worth of foreign peoples are unambiguously connected.50 This bibliophilia of the medieval period has led scholars to label the Muslim world a ‘civilisation of the book’51 and the role of books in al-Ǧāḥiẓ’s worldview seems to be an early expression of this ‘global’ aspect of Muslim bibliophilia. In seeking the origins of the Muslim partiality to books, Western scholars have traditionally considered that the prototypical respect of kitāb and ʿilm emanate directly from the Qurʾān.52 The Qurʾān does contain a literate-intellectualised conception

---

49 Al-Ǧāḥiẓ’s esteem for knowledge is famous (Ch. Pellat, Le Milieu Basrien, 68), and al-Ǧāḥiẓ’s dual conception of books-knowledge has been noted by ‘A. Arhila, al-Kitāb (see particularly 16, 66, 142) and N. Anghelescu, Langage et Culture, 59-59. Al-Ǧāḥiẓ wrote specifically on the topic of knowledge, composing texts entitled Faḍl al-ʿilm, Risālat al-muʿallimīn, al-ʿĀlim wa-l-ǧāhil and three separate texts about maʿrifā. Ch. Pellat, ‘Nouvel essai’, 130, 141, 147–8.

50 For an archetypal expression of this bibliocentrism, see Tabaqāt al-Umam of Sā`id ibn Ahmad al-Andalusī (d. 462/1070). See note [65] below.

51 G. N. Atiyeh, The Book in the Islamic World, xiv. J. Pedersen’s The Arabic Book is the classic exploration of the paradigmatic ‘bibliophilia’ in Islam. See also J. Bloom Paper Before Print (116–23) for a description of the outpouring of ‘book culture’ and S. Günther’s ‘Praise to the Book!’, 126 for the scholarly backing of this enterprise.

52 J. Pedersen opens his classic work with the phrase ‘The Arabic book owes its origin to Islam’ (The Arabic Book, 3) and identifies the Qurʾān as the first ‘proper’ Arab book (ibid., 12–16). As for ʿilm (knowledge), F. Rosenthal
of human existence: it makes myriad citation of kitāb and ‘ilm, it teaches that the kitāb will ‘release the people from darkness into light’ (Qurʾān 14:1), and it closely equates ‘ilm with the ideal human condition, describing Muslims as those who have or seek ‘ilm, in contrast to non-believers who act ‘without it’ (Qurʾān 31:20).\(^{53}\) However, the inference that the Qurʾān is the basis of later expressions of Muslim intellectualised bibliophilia risks anachronism.\(^ {54}\)

While the Qurʾān, al-Ǧāḥiẓ and later Muslim writers all seem united in the same knowledge-seeking bibliophilic chorus, current scholarship is revealing that the acceptance of books as authoritative depositories of ‘ilm was a protracted process, the stages of which ought to be separated. First, in an insightful monograph, Madigan demonstrated that the Qurʾānic conception of the ‘enlightening kitāb’ was not a ‘book’ in the modern sense of a closed, definitive, authored text. Madigan argued that the Qurʾānic ‘kitāb’ is a symbol for God’s authoritative knowledge, representing the totality of His guidance to mankind. It thereby transcends terrestrial, time-bound texts.\(^ {55}\) and, in fact, the Qurʾān states

considered the history and importance of ‘ilm throughout Muslim thought, proposing that prior to Islam the Arabians had a very limited appreciation for ‘ilm (conceived as scholarly knowledge), and were left in a somewhat ‘dark age’ where knowledge was restricted to desert landmarks and practical matters of survival (Knowledge Triumphant, 9-16). According to Rosenthal, the revelation of the Qurʾān, with its particular emphasis on ‘ilm (ibid., 20) ushered in the advanced theoretical epistemology (ibid., 2). See also ‘A. Arḥila for the commonly held view that wide-ranging knowledge seeking is an integral aspect of Islamic belief (al-Kitāb, 19, 67).

\(^ {53}\) In the same vein, the Qurʾān chastises those who ignore ‘ilm when it is taught/revealed to them (Qurʾān, 2: 145; 13: 37).

\(^ {54}\) Promulgators of this conception, such as Rosenthal, do note the multifaceted meaning of ‘ilm in Muslim thought. However, Rosenthal’s analysis implies the Qurʾān has retained a determinative role in shaping ‘ilm’s parameters (Qurʾān, 42–5, 48–90). This analysis primarily relies on texts from the later 3rd/9th century, leaving the first 250 years of Muslim intellectual history as a stasis in which the Quranic ideal seemingly was little changed.

\(^ {55}\) For D. Madigan’s elucidation on the meaning of kitāb in the Qurʾān see The Qurʾān’s Self Image, 52–4; 70–2; 105; 145. According to Madigan, in the language of the Qurʾān, a printed copy of the text should not be referred to as kitāb, and for this reason, he proposes, the term muṣḥaf was adopted (ibid., 36–37). When the Qurʾān refers to written documents it eschews the verb kataba for physical writing (ibid., 108–9) and refers to physical ‘books’ with words like subḥaf and qirṭās (ibid., 122–3).
that no human-authored book can approach the power of the Kitāb.\footnote{See the Qurʾān 2: 79 for its extreme censure of the human act of claiming their writings to be like God’s kitāb.} While the Qurʾān does establish a discursive framework in which kitāb and ‘ilm are connected in a tremendously positive manner and the possession of kitāb symbolises ‘correct guided’ life, it is unlikely that the earliest Muslim audiences associated this symbolic grandeur with terrestrial kutub (understood as human authored texts or anything ‘written’\footnote{A definition drawn from the earliest Arabic dictionary Kitāb al-ʿAyn, which identifies kitāb as the ‘verbal noun’ (maṣdar) of the verb kataba ‘to write’ (al-Ḥalīl, Kitāb al-ʿAyn, 5: 341).}). The elevation of terrestrial kutub to the centrepiece of later Muslim bibliophilia is a separate phenomenon achieved via the gradual maturation of the writerly culture.

Towards a ‘writerly culture’: the concept of the ‘book’ in 3rd/9th-century Iraq

Muslim ‘writerly culture’, which began to emerge about one hundred years after the Qurʾān’s revelation, would eventually champion the human-authored book and provide the necessary theoretical backdrop to use the book in appraising peoples of the world.\footnote{Madigan notes that the impetus to ascribe terrestrial written texts with kitāb was aided by the written codification of the Qurʾān in a written muṣḥaf during the 1st/7th century which began to elevate respect for the written word (The Qurʾān’s Self Image, 23, 47–8).} But in al-Ḡāhīzʾs day, ‘writerly culture’ had not entirely matured and the status of books remained debated. Until the latter 2nd/8th century, scholars were primarily praised for their capacity to memorise.\footnote{Anecdotes recording the lampooning of traditionists in the 2nd century who relied on written notes and praising those who allegedly knew all their material from memory are frequently cited in debates about the authenticity of the ḥadīṯ, the permissibility of writing them and the development of a written ḥadīṯ tradition. Conversely, Schoeler stresses the important role of notebooks (hypomnemata) from early times (The Oral and the Written, 114–128). Irrespective of the private use of such notes, the public display of knowledge from memory was important, witnessed by the scale of anecdote in the Islamic tradition.} In contrast, book ‘publication’ was extremely limited.\footnote{Both Nabia Abbot (Studies in Arabic Literary Papyri) and Fuat Sezgin (Geschichte des arabischen Schrifttums, 1) gathered evidence for scholarly writings in the latter first and second centuries of Islam. Subsequent research has cast doubt on these attempts to identify primordially early texts in the Islamic tradition (G. Schoeler, The Oral and the Written, 40).} formal writing was restricted to
bureaucratic matters and scholarly writing was limited to informal notebooks for personal use or shared between students. These writings, sometimes identified in the sources as *kutub*, should not be construed as ‘books’ in the sense of formally published closed-ended texts.\(^{61}\) Knowledge transmission was likely aided by written notes, and scholars did not only rely on their powers of memory. However, presumptions of 20th-century scholars in the tradition of Goldziher who sought to prove that the transmission of knowledge *relied* on writing have ignored the staunch opposition to writing as detailed by Cook and they lack evidence given the limited numbers of surviving papyri and other writing fragments from the period.\(^{62}\) The word of the scholar possessed greater value than his writings,\(^{63}\) and the authority of human written texts seems to have been somewhat mistrusted across the Islamic world, and particularly in al-Gāhīz’s hometown of al-Baṣra.\(^{64}\) In this environment, the first translations of the ‘foreign’ texts from the Sāsānian Persian, Greek, and Indian traditions would have circulated primarily in the palaces and administrative centres and not ventured far into the circles of the wider Muslim scholarly community.\(^{65}\) Overall, recourse to written notes was largely outside of public view,\(^{66}\) books lacked authority as standalone repositories of knowledge and consequently there was therefore almost no scope in the first two centuries of Islam to accept either the notebook *kutub* or translations of non-Arabic texts as epitomes of authoritative knowledge transmission.

As noted above, the introduction of paper and perhaps a greater familiarity with the textual traditions of pre-Islamic Near Eastern

\(^{61}\) This theory was first proposed in the 19th century by Alois Sprenger and has been carefully developed in *The Oral and the Written* and *The Genesis of Literature* by Schoeler who identifies these writings as ‘notebooks’ / hypomnema. For a summary of the difference between hypomnema and syngramma (the published book) see G. Schoeler, *The Genesis of Literature*, 21.

\(^{63}\) Schoeler argues for a fairly wide use of the hypomnema (*The Oral and the Written*, 40–41). Similarly Abbott (*Studies in Arabic Literary Papyri*) provides ample physical evidence for the writing heritage of the Umayyads, however neither gives an indication that books were upheld as praiseworthy repositories of ʿilm – this appears to have been the characteristic of the scholar, not his books.

\(^{64}\) M. Cook, ‘The Opponents’, 444–6.

\(^{66}\) Ibid., 27.
cultures via the growing translation movement nudged the writerly culture forwards in the latter 2nd/8th century. At this time Sibawayh (d. 180/796) ‘published’ al-Kitāb: one of the very first Arabic books definitively produced by its author and released to the public in written form. Following Sibawayh’s model, books began, slowly and rather faltering initially, to be ‘published’ to a growing reading public, and during the lifetime of al-Ǧāḥiz, the book was beginning to establish itself as a definitive repository of knowledge that could be read on its own. With the human-authored text finally familiar and widespread in society, Muslim writerly culture could begin to conceptualise the human-authored book as synonymous with ʿilm and right-guided living in their vein of the Qurʿānic kitāb. As tangible objects, they became closely associated with their authors and as abstract symbols of knowledge,

---

67 The role of translated materials is discussed by ʿA. Arḥila, al-Kitāb 66–7 and the effects of increased paper production by J. Bloom, Paper Before Print, 91, 110–13. Other factors cited for the growing importance of books include the rise of administrative writings (S. Toorawa, Ibn Abī Ṭāhir, 1–2, 9), a gradual development from increasing reliance on the scholarly notebooks (G. Schoeler, The Genesis of Literature), the role of the Muʿtazilite sect’s preference of reasoned thought over memorised facts (S. Günther, ‘Praise to the Book!’ 131) and a broadening of the literate public who sought books outside of a formally professional context (S. Toorawa, Ibn Abī Ṭāhir, 1). It would seem logical that all of the above played a part. 68 G. Schoeler, The Genesis of Literature, 88–9 who identifies this book as a syngramma – akin to the modern concept of an authored, published ‘book’. 69 Schoeler cites the written poetry anthology of al-Mufaddal al-Ḍabbī and Ibn Ishāq’s al-Kitāb al-Kabīr as examples (The Oral and the Written, 71). Abbott compiles a list of the surviving ‘books’ produced in the 3rd/9th century, indicating the growing frequency of formal publication (‘A Ninth-Century Fragment’, 147–9). 70 Noted by S. Günther, ‘Praise to the Book!’ 139–140, who cites the earlier article of A. Ghersetti for evidence of the third-century opinion of the book as primary means of preserving knowledge (‘L’utilità della scrittura e la lode del libro’ [The Usefulness of Writing and Praise of the Book]). 71 Al-Ǧāḥiz explicitly makes this connection, to be considered below. 72 The close association of authors and their books begins to appear in the 3rd/9th century and is even more apparent the succeeding period. The early identification of books with their authors can be noted with Mālik ibn Anas and al-Muwaṭṭā’, al-Buḥūf and Muslim with their hadīṯ collections, and in the 4th/10th century we note Abū al-Farağ al-Iṣfahānī became popularly identified as ṣāḥib al-ʿAǧānī indicating the association between author and his most famous work. In a similar vein, nations would similarly become identified by their
they became a readily deployable means to recognise cultured life. The possession of books therefore was directly linked to praiseworthy social status, opening the door for the application of a bibliophilic model to appraise other societies and past civilisations.

The writerly culture’s maturation in the 3rd/9th century accords well with al-Ǧāḥīz’s bibliophilic worldview, and the contrast with the seemingly retrenched orality of the earlier period has understandably led modern researchers to identify the 3rd/9th century as literate,73 and writers such as al-Ǧāḥīz and Ibn Qutayba as veritable champions of the writerly culture.74 The enthusiastic appraisal of this period’s literacy, however, ought to be tempered: writerly culture and the lofty status of kitāb were in a formative stage during al-Ǧāḥīz’s lifetime. Authors still relied on aural sources, even into the 4th/10th century,75 and the degree of autodidactism (from books), anecdotally noted in the 3rd/9th century does not appear to have entirely superseded aural study.76 Genres such

books, and expressions such as qālat al-Rūm (‘the Rūm say’) or fi kutub al-Rūm (‘in the books of the Rūm’) are noted in texts of Ibn Qutayba (G. Lecomte, *Ibn Qutayba*, 190). The notion of authors acquiring a proprietary right in their book is a vast and under-explored ramification of the development of the writerly culture, however, its origins in the 3rd/9th century along with the development of the critique of plagiarism are introduced in S. Toorawa, *Ibn Abī Ṭāhir*, 26–9).

73 In the case of the Islamic sciences, see M. Cook (‘The Opponents’, 476), and more generally, S. Günther ‘Praise to the Book!’; and A. Gheretti ‘L’utilità della scrittura’.

74 See for example, S. Günther, who comments on the ‘vigorous stance’ of Ibn Qutayba and al-Ǧāḥīz in promoting ‘reading, writing and books’ (‘Praise to the Book!’ , 138); ‘A. Arḍīla, who identifies al-Ǧāḥīz as Islam’s most renowned ‘bookman’ (ašḥar man aḥhabba al-kutub) (al-Kitāb, 15); N. Anghelescu, who describes al-Ǧāḥīz’s era as ‘temps d’ouverture intellectuelle’ where intellectuals paid the book great reverence (Langage et Culture, 56–8); and G. Schoeler, who argues for a much wider readership of al-Ǧāḥīz compared to writers of previous generations (‘Writing for a Reading Public’, 59–60).

75 This is the topic of W. Werkmeister’s research *Quellenuntersuchungen zum Kitāb al-İqḍ al-farād des andalusiers Ibn ‘Abdrabbih* (246/860–328/940): ein Beitrag zur arabischen Literaturgeschichte (Berlin: Klaus Schwarz Verlag, 1983), and similar conclusions regarding Kitāb al-Ągānį and al-Ṭabarį’s Tārīḥ are noted in G. Schoeler, *The Oral and the Written*, 37–9.

76 The emergence of the autodidactic basis for self-study from books is noted by S. Toorawa, *Ibn Abī Ṭāhir*, 15–16). While this clearly formed the basis for much of the intellectual activity of the period, in the 3rd/9th century, Schoeler’s evidence suggests that the autodidactic process and wiţāda (‘finding’ information in books) still lacked the authority of learning from formal lessons
as philosophy and medicine may have been less fettered by oral legacies, but this should not distract us from conceiving the 3rd/9th century as one of transition.\(^77\) Published texts were certainly widespread, but the concept of the human-authored book as an authority for ‘ilm was novel and remained an open question. This seems to have influenced al-Ḡāḥīz, and closer analysis of his contrary opinions on books and, consequently, foreigners reveals a more complex discourse.

**Al-Ḡāḥīz: an ambivalent bibliophile**

Al-Ḡāḥīz the ‘book-praiser’ is most evident in *al-Ḥayawān* and a shorter epistle on teachers (*Risālat al-Mu‘allimīn*) where, in an elaborate analysis of the literate traditions of past civilisations, he marshals ‘the book’ in a markedly bibliocentric manner. Al-Ḡāḥīz as ‘book-censurer’, on the other hand, emerges in *al-Bayān wa-l-tabyīn* and other texts where he expresses different intentions which impacted upon his esteem for the bibliophilic literate epistemology and the relative merits of book producing peoples.

**Al-Ḡāḥīz: lover of books and knowledge**

The bibliophilic tenor of *al-Ḥayawān* and *Risālat al-Mu‘allimīn* is well known.\(^78\) Al-Ḡāḥīz extolled human authored books for their utility, durability and dependability which make them an easy reference, a more efficient store of information than memory (seemingly a direct critique of the aural Islamic tradition),\(^79\) and the most robust method to preserve information against the ravages of time.\(^80\) In short, he writes:

> Were it not for the book, the stories of the past would become corrupted and the sayings of those absent would be cut off. Your tongue [can only
> or mağālis (sessions) with other scholars (G. Schoeler, *The Genesis of Literature*, 115–17).

\(^77\) For the more ‘writerly’ context of the ‘foreign sciences’ see S. Toorawa, *Ibn Abī Ṭāhir*, 9. He cites Rosenthal’s *The Technique and Approach of Muslim Scholarship* which stresses that ‘all branches of literature relied for their preservation on written fixation’ which, dating from 1947 seems to overstate the rapidity of the writerly culture’s advance in the 3rd/9th century (S. Toorawa, *Ibn Abī Ṭāhir*, 11).

\(^78\) In particular, S. Günther (‘Praise to the Book!’) and N. Anghelescu (*Langage et Culture*, 54–66) use excerpts from *al-Ḥayawān* to explore the bibliophilic leanings of al-Ḡāḥīz.

\(^79\) *Hayawān*, 1: 37. Al-Ḡāḥīz’s critique of this tradition is the subject of S. Günther’s ‘Praise to the Book!’, 131, 138.

inform] those present, while the pen [can inform] the absent – those who came before you and those who will come after. Thus, the benefit of the pen is greater, and the public administration (dawāwīn) in greater need of it.81

With his flamboyant description of the ‘book’ as ‘a vessel, full of knowledge, a container stuffed with cleverness, and a receptacle of mirth and sagacity’,82 al-Ǧāḥiz portrays books as quintessential carriers of ‘ilm, akin to the Qurʾānic kitāb, and in reporting that the Qurʾān and other books of revelation are the best kutub,83 he implicitly groups all books, terrestrial and divine, in one conceptual category, the Qurʾān now being the ‘best book’, and not the ‘only book’.

Having established the intellectual value of books, al-Ǧāḥiz describes their utility in developing a successful and right-guided society. He explains that ‘spending on books indicates a respect for ‘ilm, and a respect for ‘ilm indicates the nobility of the soul and its integrity from the intoxication of faults.’84 He explicitly lauds this ‘bookish’ ‘ilm, casting it in opposition to jahl (ignorance-passion), as the ‘pillar of the soul’, the ‘origin of all good things’,85 and the basis for social order:

God does not take ‘ilm from people. However, He takes away their scholars, and when there is no scholar left, the people choose ignorant rulers who govern without ‘ilm, and they go astray and misguide [their people].86

82 al-Kitābu wīʾāʾun malfun ʿilm wa-ẓarfin ḥaṣiya ẓarfan wa-ināʾun šūhina mizāḥān wa-giddan (Hayawān, 1: 32).
83 Ḥayawān, 1: 59.
84 Ḥayawān, 1: 41.
85 Such sentiments concerning ‘ilm are frequently cited in al-Bayān wa-l-tabyīn and the Rasāʾīl of al-Ǧāḥiz. See in particular Bayān, 1: 84–5, 1: 257 and 3: 12. The ‘pillar of the soul’/ʿimād al-rūḥ quotation is from Bayān, 1: 77. For the praise of ‘ilm as the origin of all good things: wa-l-ʿilmu aṣlū li-kulli ḥayrīn wa-bihi yaḥfaṣīnu al-karamu mina l-luʾmi wa-l-ḥalātu mina l-ḥarām (Rasāʾīl, 3: 35, Muʿallimīn).
86 Bayān, 1: 257: inna liḥā lā yaqbiḍu l-ʿilma nīzāʾin yantaziʿuḥu mina l-nāṣi wa-lākin yaqbiḍu al-ʿulamāʾa ḥattā iḍā lām yabqa ʿalimun ittaḫīda l-nāṣu ruʿasāʾa ḡuwālān fa-suʾilā fa-aftaw bi-ḡayri ʿilmīn wa-dallū wa-adallā.
Taken together, al-Ǧāḥiz’s statements demonstrate that books transcend mere depositories of information: they are symbols for the pursuit of ‘ilm and *prima facie* evidence for the existence of culture and learning.

In *al-Ḥayawān*, al-Ǧāḥiz develops this bibliophilic reasoning into a world-historical vision whereby books become the *sine qua non* of humanity’s intellectual development across time and space, which is the basis of his ‘universal’ bibliocentric outlook noted above. To prove it, he explains that humans, as created by God, are unable to live self-sufficiently and are dependent on one another.87 From this principle, he argues that maintaining this necessary contact with neighbours is not always possible, hence the logical necessity of writing to communicate with those who are not immediately present.88 Al-Ǧāḥiz asserts that groups of people (*umam*) similarly rely on the passage of knowledge from past societies to advance their own learning and avoid mistakes of the past.89 Arguing that books are the only remaining tangible link with the past,90 al-Ǧāḥiz concludes that books vitally maintain the venture of knowledge on earth.91 The cycle is also continuous: writing is an ‘intellectual duty’ for the present in order to edify future generations and allow them to develop ‘ilm into new horizons.92

The elevation of books into vessels of ‘ilm, and the portrayal of ‘ilm as the unifying force underwriting the sweep of human history from its origins and into the future neatly generates a global bibliocentric worldview whereby Muslim civilisation can locate itself as a participant in the historical endeavour of knowledge where each civilisation is a link in a chain soldered by books. Here al-Ǧāḥiz presents one of the earliest formulations in Muslim writing of an intellectualised and bibliophilic worldview at its humanistic apogee: inclusive and cosmopolitan.

---

87 *Hayawān*, 1: 34–5. The Qurʾān frequently considers mankind’s lack of self sufficiency, although this is adduced as evidence of their inferiority to God (e.g. 92: 8, 96: 6–7). Al-Ǧāḥiz echoes this principle, but has shifted the emphasis to the need for humans to look for mutual help from *each other*.

88 Ibid.

89 *Hayawān*, 1: 53

90 Al-Ǧāḥiz makes this statement on account of books’ ability to survive whereas he believed architectural monuments and the other attempts of past civilisations to immortalise their accomplishments are more susceptible to the ravages of time than books. *Hayawān*, 1: 49–52.

91 *Hayawān*, 1: 59

92 *Hayawān*, 1: 60. See *A. Arḥīla (al-Kitāb*, 35–39) for an alternative, though similar reading of *al-Ḥayawān* to that presented here.
Al-Ǧāḥīz: respect for foreign book-writers

His intellectualised worldview weaves together the contemporary status of books, opinions on the merits of past peoples and the contemporary translation project into a discourse asserting the primacy of books in knowledge acquisition which enables him to use ‘the book’ as a means to appraise other peoples, automatically elevating the status of book producers and validating his own 3rd/9th-century adab culture which, via the translation project, was benefitting from past literary heritages.93

Since many of the 3rd/9th-century intellectuals were not Arabian, it may seem unusual to refer to the intellectual heritage of Persians and Greeks as ‘foreign’, however, in light of al-Ǧāḥīz’s intellectualised conception of world history, issues of ethnicity, as noted above, were less concerned with ‘blood relation’, and more with intellectual achievement. As such, al-Ǧāḥīz’s discourse on ethnicities had a rearward looking aspect – the ‘Persians’ could be viewed as a past civilisation, and understood as contributors in the story of human knowledge production, assessable by the volume of their scholarly heritage. Societies that produced books earned a place for themselves in ‘history’, while those lacking literate traditions neither learned anything from those before them, nor could bequeath anything to posterity, and so had no place in al-Ǧāḥīz’s view of history.94 In al-Hayawān, al-Ǧāḥīz thus commends his book writing intellectual predecessors, expressing his gratitude that Indian astronomy was preserved in their ‘scripts’ (ḫuṭūṭ)95 and professing a high opinion of Aristotle, Plato, Ptolemy and Democritus as pioneers of science and learning.96 In light of the close association of books with their authors in the emerging writerly culture, this intellectual, bibliocentric lens rendered foreign societies synonymous with their books. The wise Greek-thinkers and just Persian kings who emerge in Arabic adab as veritable stereotypes of Greeks and Persians

93 Al-Ǧāḥīz relied on these sources himself: Ch. Pellat (The Life and Works, 4–5) notes al-Ǧāḥīz’s exposure to Persian and Indian influence in al-Beṣra (where al-Ǧāḥīz was born) and increasing access to Greek influence in Baghdād (where he lived a long segment of his adult life).

94 The role of the book in establishing the merits of past literate cultures has been similarly considered by N. Anghelescu, Langage et Culture 55–6, 59. She has, however, neglected to consider the negative opinions which al-Ǧāḥīz expressed about books, and to attempt a synthesis of these paradoxical strands in his thought. Such an exploration and a possible synthesis will be offered below.

95 Hayawān, 1: 36.

96 Hayawān, 1: 52.
appear to have stepped off the pages of the translated Greek and Persian books and into the imaginations of ʿAbbāsid writers. It is perhaps not coincidental therefore, that medieval Arabic literature generally gives more detailed accounts of the history of Greek books than it does the Greco-Roman political history. The ‘inclusive’ aspect of the writerly culture of al-Ǧāḥiẓ’s day has been identified as the beginning of an increasingly ‘secular’ (perhaps better labelled cosmopolitan) conception of knowledge in ʿAbbāsid circles as a widening audience consumed the knowledge of past peoples by reading their books. Based on the discourse in al-Hayawān, it seems straightforward to conclude that al-Ǧāḥiẓ squarely identified book production with worthy culture and that his bibliophilia transferred smoothly to xenophilia in the case of non-Arabic book-producing peoples. But this discourse on the centrality of books and praise for book producing people also displays a more pointed self-serving element underlying his seemingly effusive bibliophilic cosmopolitanism.

Given that the Muslim civilisation of al-Ǧāḥiẓ’s day had built its intellectual edifice upon the collective traditions of Arabians, Persians, Indians and the Rūm, it is entirely logical that al-Ǧāḥiẓ would commend these peoples on the basis of books. His discourse asserts that their books were ‘worth reading’ and so argues for the usefulness of their further translation and study in ʿAbbāsid Iraq. While the original authors were praised as a by-product of this argument, perhaps more importantly for al-Ǧāḥiẓ’s purposes, his equation of reading with the concept of social progression over time enabled him to theorise that his culture, which both consumed books of the past and wrote new books, stood at the pinnacle of human progression: the legitimate and worthy successor to

---

97 While fourth-century Muslim world histories such as al-Ṭabarī, al-Masʿūḍī or al-Maqdisī give fairly sketchy accounts of Roman Emperors and Greek kingdoms, their contemporary Ibn al-Nadīm narrates in fine detail the transmission of Greek texts from their ancient origins to their Arabic translations (e.g. for medical texts see Fihrist, 345–6). Further analysis of this discrepancy would be interesting to explore, but it is beyond the scope of this paper.

98 S. Toorawa, Ibn Abī Ṭāhir, 129. Toorawa notes that the term ‘secular’ is of questionable application here, but intends by this the development of an adab culture in distinction to the scholarship specialised in the Islamic traditions.

99 Perhaps this accounts for al-Ǧāḥiẓ’s mention in his epistle on the ‘Virtues of the Blacks’ that the term for the written text of the Qurʾān, muṣḥaf, derives from ‘Ḥabāshi’ origins which thereby attempts to delineate some literate element in African culture, and thus a point of merit (Rasāʾil, 1: 202, Faḥr al-sūdān).
its polyglot past. This has been identified as one of the centrepieces of al-Ǧāḥīz’s thought and the theme of al-Ḥayawān. Al-Ǧāḥīz, in the guise of a bibliophilic xenophile could thereby claim that the ʿAbbāsid scholars, via their translation of Persian, Greek and Indian sources had collated the entirety of humanity’s knowledge and could legitimately consider themselves the most erudite nation yet. His outward cosmopolitan ‘humanism’ may thus be more inward looking and self-serving, linking with al-Ǧāḥīz’s discourses on ethnicity as an Arabian partisan in al-Bayān wa-l-tabyīn. Pellat observed this tendency and related it to the character of adab culture to ‘prendre de tout un peu’ and to borrow from foreign cultures without accepting their superiority to Arab culture. This is an accurate observation, but these leanings of al-Ǧāḥīz are tied to a more multifaceted theory about books and knowledge in general. The anti-book, xenophobic trend in his writing now calls for examination.

Al-Ǧāḥīz the book cynic
Al-Ǧāḥīz’s bibliophilic introduction to al-Ḥayawān was a polemical treatise. He draws our attention to this, noting that he wrote it in self-defence against those whom he described as unjust critics of his writings. Furthermore, the influence of al-Maḥāsin wa-l-Maṣāwi’s genre has been noted as operative in al-Ḥayawān more generally, which cautions an uncritical acceptance of the content of al-Ḥayawān at face value. His extravagant description of books as ‘the most humble teacher; the most capable companion; the least boring and least grating friend…the most ready support’, and his florid analogy of the book as a tree having the ‘longest lifespan and sweetest fruit which is most easily

---

100 Al-Ǧāḥīz is typically associated with this perceived cosmopolitan trend in Muslim culture of the 3rd/9th century (Ch. Pellat, ‘al-Ǧāḥīz’, 387; N. Anghelescu, Langage et culture, 54–5). Enderwitz proposed, based on analysis of al-Ḥayawān, that adab represents a fusion of the Arabian with the non-Arab cultural heritage and that al-Ǧāḥīz considered adab books as the highest forms of historical human expression, behind only the Qurʾān (S. Enderwitz, ‘Culture History and Religion’, 235–237).

101 A term applied to al-Ǧāḥīz in Al-Ǧāḥīz: a Muslim Humanist for our Time (‘Introduction’, v) and to al-Ǧāḥīz’s cultural milieu by N. Anghelescu, Langage et Culture, 63, 66.

102 Ch. Pellat ‘Djāḥiz et la littérature comparée’, 95–6, 98.

103 Hayawān, 1: 7–14.

picked’¹⁰⁵ are all specifically intended to rebut the critic of his books.¹⁰⁶ In short, by promoting the virtues and social utility of books in general, al-Ḡāḥīz could defend his reputation as a writer and argue that his books ought to be read in the most positive possible light.¹⁰⁷ Al-Ḡāḥīz certainly saw himself as a worthy participant in an intellectual heritage mediated by books, but he neither claims that all books are of equal merit nor that all writers are deserving of equal esteem.

Even in *al-Hayawān*, al-Ḡāḥīz notes that other forms of communication are potentially as useful as books (depending on the circumstance), and that the pen and tongue are balanced in virtue, making no explicit statement of the written word’s greater merit.¹⁰⁸ He expressly states that his only intention in writing *al-Hayawān*’s introduction was to ‘expound the virtues of books’.¹⁰⁹ The fuller exploration of communication and knowledge hinted in *al-Hayawān* is taken up in *al-Bayān wa-l-tabyīn* where his treatment of books is not quite so effusive.

Even before turning to his other writings, a reader of *al-Hayawān* can perceive various criticisms of books. Al-Ḡāḥīz censured the books of the *zanādiqa* (Zoroastrian Persians), lamenting their lack of ‘ilm, poor style and dismissing their stories of heroes, demons and wondrous adventure (à la *Ṣāḥmāme*) as ‘idle, inept legends’ lacking ‘useful’ knowledge, wisdom, witticism or anecdote.¹¹⁰ In his opinion, expenditure on these books is wasteful: they are *gāhil* (ignorant), misguiding readers away from both self-improvement and religious enlightenment.¹¹¹ Al-

¹⁰⁶ *Hayawān*, 1: 23: *la’alla ra’yaka inda ḍālika an yatahawwala wa-qawluka yatabaddal* (that perhaps your opinion [after reading this book] will transform and your [previous critique] will change).
¹⁰⁸ *Hayawān*, 1: 38, 50–1.
¹⁰⁹ *Innamā qaṣdunā bi-kalāminā ilā l-iḥbārī ‘an faḍṭātī l-kitāb* (Hayawān, 1: 38).
¹¹⁰ Al-Ḡāḥīz describes the content of these books as ‘haḏr, wa-‘iyy wa-ḥurāfa’, and the material they lack includes: *maṭal sā‘ir, ḥabar ṣarīf, ṣan‘at adab, ḥikma ḡarīb, falsafa* (Hayawān, 1: 42)
¹¹¹ Al-Ḡāḥīz (Hayawān, 1: 43) explains this though the rhetorical question: *fa-ayyu kitābīn aḏḥalu wa-ayyu tadbīrin afsadu min kitābīn yūḡību ‘alā l-nāsī l-īţā’a... wa-laysa fīhi salāḥu ma‘ašīn wa-lā taṣḥīh din* (What book is more ignorant, or what work is more corrupting than a book which demands obedience from its readers, but lacks any element of bettering their lives or edifying their religion?).
Hayawān also invokes ġahl to describe books written by Muslims which are censured as ‘trashy’ (kutub al-furrāğ al-ḥula‘ā’) or as ‘diversions and banter’ (kutub al-malāḥī wa-l-fukāḥāt). Similarly, he relates criticism of books authored by those with bellicose agendas, shallow values or affected by the ‘rancour of the ġāhiliyya’. Al-Ḡāḥīz narrates these opinions from the voice of a (hypothetical) critic, but it indicates what he conceived as the antithesis of his books. While we have seen that al-Ḡāḥīz equated some books with the Qur’ānic kitāb, i.e. as symbols of ‘ʿilm, this was by no means a blanket endorsement for all books.

Outside of al-Hayawān, we find al-Ḡāḥīz denigrating the ‘writerly culture’, censuring those who read excessively and reproduce ‘book language’ as mere followers (tābi‘ī), especially criticising the kuttāb – the state secretaries whom modern scholars consider to be among the first movers towards the writerly culture at the end of the 2nd/8th century. These negative aspects of the writerly culture justify, for al-Ḡāḥīz, why God chose not to bestow skills in al-ḥāṭṭ (handwriting) on Muḥammad. And so al-Ḡāḥīz paradoxically undermines al-Hayawān’s framework for the transmission of knowledge across the sweep of human history by literate scholars.

Al-Ḡāḥīz hints at further suspicions regarding books in al-Hayawān in an insightful passage where he highlights the perilous journey of ‘book knowledge’ across time through the hands of copyists and translators. In particular, we read that the dual requirements for an ideal translator – (a) linguistically wholly proficient in the original and target language, and (b) intellectually on par with the authors whom he translates – can only exist in theory. Consequently, al-Ḡāḥīz notes that translations even in the ‘straightforward’ fields of geometry and philosophy (al-handasa wa-l-falsafa) can be found lacking, while errors are almost guaranteed in religious sciences, where precision and knowledge are paramount. In short, books emerge as twisted, corrupt and unreliable conveyors of

115 Rasāʿīl, 2: 189–90 (Kuttāb).
117 Ibid.
past knowledge as they pass through the ‘criminal hands’ of copyists.\textsuperscript{118} The above passage is enigmatic: it is not the direct speech of al-\textsuperscript{Ǧ}āḥiẓ, but again a ‘quotation’ from a hypothetical critic defending the Arabic oral poetic tradition. However, al-\textsuperscript{Ǧ}āḥiẓ does not refute any of these arguments and in fact adopts them himself elsewhere.\textsuperscript{119} Thus, with his signature ambivalence, al-\textsuperscript{Ǧ}āḥiẓ leaves to the reader the task of resolving the question of whether books can or cannot accurately transmit ‘\textsuperscript{ʾ}ilm. Akin to the linguistic quandary that bedevils translation, al-\textsuperscript{Ǧ}āḥiẓ also cites the negative effect of writerly culture on language generally. He explains that book culture tends towards \textit{takalluf} (unnatural mannerism)\textsuperscript{120} and readers who fashion their speech after books develop stiff and artificial language.\textsuperscript{121} Surprisingly for a bibliophile, al-\textsuperscript{Ǧ}āḥiẓ deems written language an inappropriate guide for good rhetoric!

\textit{Al-\textsuperscript{Ǧ}āḥiẓ: censurer of book-writing foreigners}

Al-\textsuperscript{Ǧ}āḥiẓ’s denigration of the literate foreign cultures which he elsewhere extolled is less commented upon in modern scholarship.\textsuperscript{122} Regarding the Sasanian Persians, al-\textsuperscript{Ǧ}āḥiẓ criticised their books and intellectual

\item[120] \textit{Bayān}, 3: 29.
\item[121] This even includes reading books authored by eloquent and/or wise writers (\textit{kutub al-bulaghā’...wa-dawāwīn al-hukamā’}): \textit{Rasāʾil}, 3: 40–1 (\textit{Mu’āllimīn}).
\item[122] The only article of which I am aware which specifically considers al-\textsuperscript{Ǧ}āḥiẓ’s negative opinions of Persian, Indian and Rūmī books is Ch. Pellat’s ‘\textit{Djāhiẓ et la littérature comparée}’ where Pellat attributes these comments to al-\textsuperscript{Ǧ}āḥiẓ’s method of grappling with the \textit{adab} culture’s integration of foreign ideas. This shall be further considered below.
\end{footnotes}
heritage. He considered their books exhibit a laboured style, which he attributed to the Persian authors’ lack of natural brilliance and linguistic spontaneity, as, in his view, they copied from each other. Further, he cast doubt on the authenticity of the translated Persian books circulating in ʿAbbāsid Iraq, insinuating that they may have been, in part, forged by translators in the early ʿAbbāsid era. In this argument, he adopts the reasoning of that hypothetical ‘book critic’ from al-Ḥayawān: mistrusting books capacity to faithfully convey ʿilm across time, and denying the ‘Persian book’ as a basis for praising the past Persian heritage.

Having discredited Persian books, al-Ǧāḥīẓ censures his contemporaries who based their knowledge upon them in preference to the Qurʾān and hadīṯ. Repeating his critique of the book as ǧahl, al-Ǧāḥīẓ laments that the knowledge gained from Persian books is in fact ǧahl and sharply rebukes Ibn al-Muqaffāʿ, the epitome of the 2nd/8th-century Persian ʿAbbāsid scholar/translator who championed Sasanian books and culture. Evoking the Qurʾān (62:5), al-Ǧāḥīẓ relates an anecdote comparing Ibn al-Muqaffāʿ to a donkey weighed down with books carrying much ʿilm, but not benefiting in the least: ‘his knowledge made him weak, his reason baffled him, his wisdom blinded him and his insight confused him’. Persian books in al-Ǧāḥīẓ’s estimation are thus a far cry from authoritative, enlightening sources and there is little praise of Persian culture here.

Al-Ǧāḥīẓ’s censure of the ancient Greeks again focuses on a criticism of their writing style. He claims that their knowledge of philosophy and logic did not translate into elegant expressions, and that despite their theoretical understanding of language, the Greeks (al-Yūnānīyyūn) did not produce well-formed speech in practice (pace Demosthenes et al, of whom al-Ǧāḥīẓ makes no mention). Similarly, al-Ǧāḥīẓ claimed that

123 Bayān, 3: 28.
124 Bayān, 3: 29.
125 Examples he gives of these Persian books are the collections of anecdotes from the Sasanian king Arдаšīr, sayings of the vizier Bozorgmehr, Kālīla wa-Dīmna and the religious books of Mazdak. See Rasāʾīl, 2: 191–2 (Kuttāb).
126 Ibid., 2: 194–5.
127 Ibid., 2: 192, 195. Also, al-Ǧāḥīẓ lists Ibn al-Muqaffāʿ’s Arabic language book al-Adab (which is commonly known today as al-Adab al-kabīr) among the Sasanian books of ‘substandard’ ʿilm.
128 Rasāʾīl, 2: 195 (Kuttāb).
129 Bayān, 3: 27–8. He specifically notes that Ṣāḥib al-mantiq (a sobriquet for Aristotle, see G. Lecomte, Ibn Qutayba, 191–2) was a poor speaker.
Ancient Greek society as a whole, notwithstanding the intelligence of their scholars, failed to make any practical application of their theoretical knowledge and wisdom. Knowledge has no civilisational benefit if unapplied, al-Ǧāḥīẓ argues, and accordingly, when comparing the Greeks to other peoples (umam) such as the Chinese, Persians, Turks and Bedouin Arabs (Aʿrāb), he concludes that the Greeks, for all their wisdom, do not deserve a higher status.

Contemporary Byzantine (Rūmī) civilisation fared worse. Since Ancient Greek (al-Yūnān) writers lived in the distant past, al-Ǧāḥīẓ rejects the possibility that their books and intellectual heritage could be claimed by contemporary generations of Byzantines. According to al-Ǧāḥīẓ, contemporary Rūmī literary production was negligible and their language was so different from Classical Greek that they could not possibly invoke its past glories for their benefit.

As for the Indians, al-Ǧāḥīẓ less frequently discusses them in his surviving writings, but his extant appraisal of their culture similarly contains unenthusiastic evaluation of their books, which he describes as lacking both rhetorical power and creative spirit. They ‘only contain ancient meanings, not attributable to one scholar…they are merely heritage since time immemorial, well known, well rehearsed’.

Towards a resolution
Al-Ǧāḥīẓ’s paradoxical style, the relative obscurity of his life and uncertain chronology of his writings complicate a reconciliation of his ‘book loving’ and ‘book hating’ tendencies. But patterns in his seemingly contradictory statements indicate a certain coherency within a complex web of issues. His opinions about books varied, but al-Ǧāḥīẓ was clearly preoccupied with books, indicating the maturation of the writerly culture in the 3rd/9th century. His analysis of foreign peoples also frequently cited books: whether al-Ǧāḥīẓ wished to praise or

\[\text{Rasāʾīl, 3: 214–15 (Manāqib al-Turk).}\]
\[\text{Ibid., 216–18. In al-Ǧāḥīẓ’s opinion, here, these peoples excelled in a limited number of fields, but they failed to become all-round achievers.}\]
\[\text{Rasāʾīl, 3: 314–15 (al-Radd ʿalā l-Naṣāra).}\]
\[\text{He apparently wrote books in which he considered their religious beliefs and idolatry which he cites in Hayawān (1: 8–9). These are now lost and al-Ǧāḥīẓ’s conclusions are unknown.}\]
\[\text{Bayān, 3: 27: ammā l-Hindu fa-īnāmā lahum maʾānīn mudāwwanatun wa-kutubun muḥalladatun lā tudāfu ilā raḡulun maʿarūf... wa-īnāmā hiya kutubun muṭawāʾiratun wa-āḥābun ʿalā waḡhi l-dahri sāʾiratun maḡkura.}\]
\[\text{Ch. Pellat, The Life and Works, 10–14.}\]
denigrate groups, he marshalled ‘the book’, categorically denigrating those peoples whom he believed possessed no literary culture, and while privileging book producers, he cited shortcomings of their books as a means to criticise them. His critiques and praises of both books and foreign peoples also revolve around questions of language. Closer consideration of al-Ǧāḥīz’s conception of the praiseworthy book and the position of language in his worldview points towards a possible explanation of his paradoxical statements on literary culture.

The ideal book: ‘meaning and speech’
Al-Ǧāḥīz defined the ideal, unimpeachable book (muḥkam, mutqan) as having ‘sound judgment, like the smooth face of bare rock, with precise and elegant meanings; and fine and eloquent wording’. The allusions to good ‘judgement’ and ‘meaning’ reflect al-Ǧāḥīz’s belief that books can be repositories of authoritative knowledge, as discussed earlier. His inclusion of ‘wording’ (lafẓ), however, introduces a second component: ‘expression’ (bayān) and indicates the centrality of language in the constitution of a worthy book. The twin roles of ‘ilm/knowledge and bayān/expressive language as the basis of good communication are a major theme of al-Bayān wa-l-tabyīn and are similarly, though more briefly described in his other major work, al-Ḥayawān. Al-Ǧāḥīz’s opinions of bayān have frequently been discussed in medieval and

---

136 Even in Manāqib al-Turk, where he makes a fairly vigorous (and perhaps politically motivated, see above) defence of Turks, al-Ǧāḥīz does not promote them above book producers. Their skill in war and hardy attributes are praised, and while he equates their excellence in war with the Greek excellence in philosophy and the Sasanid Persian achievements in statecraft, the Turks are not raised above these two (book writing) cultures (Rasāʾil, 3: 217–18). Outside of the Manāqib, the Turks are never listed among ‘noteworthy peoples’. The non-book producing pre-Islamic Arabians are a special case, considered below.

137 Rasāʾil, 1: 350 (al-ʾAdāwa wa-l-hasad).

138 Rasāʾil, 1: 351 (al-ʾAdāwa wa-l-hasad): al-kitābu... muḥṣafan ka-an나 hu matnu hağarin amlasa bi-maʾānin latfatin muḥkama. This is, naturally(!), a description of one of his own books, though it conveys the ideal to which he strove in his own writing.

139 The similarity of al-Ǧāḥīz’s approach to bayān (Bayān, 1: 75–88 and passim and Hayawān, 1: 29–31) is important as it implies a (rare) continuity and stability in al-Jāhiz’s thought. The books were written at different times — al-Bayān before 237/851 and al-Hayawān before 232/846 — (Ch. Pellat, ‘Nouvel essai’, 133, 139) and with different aims, but notwithstanding this, their treatment of bayān is very similar.
Taking Montgomery’s and Behzadi’s recent analysis of bayān together, it becomes clear that al-Ǧāḥiẓ afforded it importance not just as an ‘intellectual playground’, but as the cornerstone for all aspects of life including the means to understand God and both the nature and meaning of the Qurʾān in Muʿtazilite theology.

Such a profound appreciation for good style and appropriate language consequently had important ramifications in many of al-Ǧāḥiẓ’s intellectual preoccupations, and his promotion of style and clarity of expression as a primary component of the ‘worthy book’ seems the product of his deep-rooted interest in bayān. Here the specific book-language nexus will be further explored to understand how al-Ǧāḥiẓ’s opinions took their particular shape and to demonstrate how his seeming ambivalence regarding the book and foreign peoples is in fact part of a more coherent discourse.

Al-Ǧāḥiẓ applied his belief in the supreme importance of communication directly to his intellectualised vision of world history. Whereas in al-Ḥayawān he emphasised the role of books in the historical venture of knowledge, it seems incorrect to assume that he considered books as the sole embodiment of this process. As noted above, even in al-Ḥayawān, he criticised the shortcomings of some books, and in al-Bayān wa-l-tabyīn, he more explicitly describes why. While books convey ‘knowledge’, al-Ǧāḥiẓ stresses that appropriate and clear expression (bayān) is necessary to faithfully transmit any learning. Badly or imprecisely written books distort the knowledge they contain and risk misunderstanding. Such books categorically fail to transmit knowledge, and hence al-Ǧāḥiẓ concluded that it is bayān, clear expression, that brings ʿilm to life. Al-Ǧāḥiẓ believed that all of the different forms of communication (which he enumerates as speaking, writing, computation, gesturing and metaphor) can convey ʿilm, and their relative suitability

---

140 See L. Behzadi, ‘al-Ǧāḥiẓ and his Successors’ and Sprache und Verstehen. Also, the recent series of articles by Montgomery have carefully demonstrated the theological leanings of al-Ǧāḥiẓ’s ‘nature/speech’ dichotomy which figure prominently across his writings (‘Speech and Nature’).

141 L. Behzadi, Sprache und Verstehen, 173.

142 See, for example, Bayān, 1: 75: al-maʿānī l-qāʿimat fi ṣudūrī l-nāsī l-mutasaawwaratū fi ʿaghānihihīm... masīrūratun Ǧaḥiẓiyatun wa-baʿidatun wahshiyyatun wa-mahgūbatun makānūtun... wa-innamā yāḥyā tilka l-maʿāniya ḍikrūhum lāhā wa-lḥārūhumʾanāhā (‘the meanings in the souls of men and conceived in their minds... are hidden and obscured, remote and inaccessible, veiled and concealed... these meanings are only brought to life by [the scholars’] mentioning of them and informing of them’).
depends on the circumstances.\(^{143}\) Sometimes ˈhaṭṭ, the written word, is ideal, but al-Ǧāḥiz maintains that clarity of expression trumps the medium: the correct conveyance of ‘ systemctl depends on the selection of the best method for the given circumstance. No single method suits all occasions: ‘the revelation of meaning occurs to the extent of semantic clarity, accuracy of expression, appropriate epitomisation [of meaning], and precision’.\(^{144}\) The transfer of knowledge, therefore, cannot logically be the exclusive preserve of literary culture.

For al-Ǧāḥiz, the perpetuation of intellectual culture via the communication of ‘ systemctl through clear bayān begins with the Qur’an since its excellent bayān is the means by which God teaches His ‘ systemctl, and ideal bayān belongs to God.\(^{145}\) But al-Ǧāḥiz cites a definition of humans as the ‘living, clear speaking (mubīn)’\(^{146}\) and so allows them to achieve degrees of eloquence too.\(^{147}\) Al-Ǧāḥiz thereby contrasts bayān with ‘iyy (inhibited speech) just as ‘ systemctl opposes ǧahl.\(^{148}\) As we have seen, he appraised books by their language and meaning together, and so it would appear, he appraised humans.

Crucially, al-Ǧāḥiz ventures that the concordance of sound meaning and correct expression in human communication approaches the Divine:

[(T)he best speech is that which is brief and obviates the need for protracted expression and the meaning of which is apparent in its expression; Almighty God grants [such speech] some of His loftiness and bestows upon it the light of His wisdom, according to the good intentions and piety of the speaker.\(^{149}\)]

\(^{143}\) Bayān, 1: 76–80 and Hayawān, 1: 29. In both texts, writing is generally lauded as one of the most efficient means of effecting good bayān, but it is not necessarily the most eloquent.

\(^{144}\) Bayān, 1: 75: ‘alā qadri wuḍāhi l-dalālati wa-ṣawābi l-išārati wa-ḥusni l-iḥtiṣāri wa-diqqati l-madāḥi yakānu izhāru l-ma’nā.

\(^{145}\) Bayān, 1: 8–9.

\(^{146}\) Bayān, 1: 77: hayawān nāṭiq mubīn, a marked, if subtle development from the usual Aristotelian conception of humans as zoon logikon, often construed as ‘rational animal’.

\(^{147}\) Bayān, 1: 8.

\(^{148}\) Ibid.

\(^{149}\) Bayān, 1: 83: wa-aḥsanu l-kalāmi mā kāna qalīluhu yuğnīka ‘an kaṭārīhi wa-ma’nāhu fī zāhirī lafżīhi wa-kāna llāh ‘ażza wa-ğalla qad albasahu mina l-ğalālati wa-ğaşšāhu min nūri l-ḥikmati ‘alā hasabi niyyati șāhibīhi wa-taqwā qā’ilihi.
Books and human activity thereby become both intellectually and linguistically construed. The Qurʾān represents the ideal concordance of meaning and language, but the model permits terrestrial communication to be appraised to the extent it approaches the Quranic standard.

Why al-Ǧāḥiẓ emphasised the centrality of bayān in the venture of knowledge and effectively promoted it above books may be explainable in part by the status of writerly culture in his day. As noted above, notwithstanding the growing importance of books in 3rd/9th-century intellectual circles, the ‘silent’ book had not replaced aural methods of knowledge transmission, and a respect for oral/aural skills and style would linger in Muslim culture for centuries. As such, emphasis on oral and other non-written forms of communication is natural, and an exclusive praise of books as stand-alone authorities of ʿilm would have seemed radical and perhaps nonsensical. Consequently, writing is a component of bayān, and indeed is privileged by the bibliophile al-Ǧāḥiẓ, but the written word is not paramount, as one may expect could be the case in a more thoroughly ‘literate’ intellectual milieu. The as-yet immature writerly culture and writerly styles of communication may thus have curbed al-Ǧāḥiẓ’s bibliophilia.

In addition to these factors, issues of ethnicity also appear which point to another intertwined agenda at work in his thoughts on bayān and, as a consequence, books in general. At the centre of this lies al-Ǧāḥiẓ’s acceptance of the Qurʾān’s stylistic pre-eminence, which is uncontroversial. However, he elevates this into an ethnic discourse whereby his conception of bayān shifts from pure stylistic analysis into a means to create a hierarchy of world languages. Inasmuch as Arabic is the language of the Qurʾān, al-Ǧāḥiẓ asserted that Arabic qua language, must possess the best potential for bayān. He explains:

There is no language on earth more enjoyable, elegant or sweet to hear, more intimately connected with clear rational thought or more expressive than that heard from the correct-speaking, sound-minded Arabians (ʿaʾrāb) and eloquent scholars.\textsuperscript{151}

\textsuperscript{150} For the persistence of the ‘oral’ aspect of learning into the late medieval period, notwithstanding the penetration of books in all fields of scholarly activity, see J. Pederson, The Arabic Book, 17, 31–6.

\textsuperscript{151} Bayān, 1: 145: innahu laysa fi l-arḍī kalāmīn huwa amtaʿu wa-lā ʿanaqu wa-lā alaḍḍu fi l-asmāʾi wa-lā asaddu ittiṣālān bi-l-ʿuqūlī l-salīmātī ... wa-lā āğwadu taqwīman li-l-bayānī min ṭūlī stimāʾi ḥadīṯi l-aʾrābī l-ʿuqalāʾi l-fuṣāḥāʾi wa-l-ʿulamāʾi l-bulaqāʾ.\textsuperscript{151}
Al-Ġāḥīz’s intellectual elitism is again at work here; his conception of bayān promotes the Arabians and his own ‘Arabised’ scholarly community above all others and disadvantages foreign cultures from the outset. Al-Ġāḥīz directed this thought to its logical conclusion: applying bayān to a global worldview, he conceded that all peoples can express themselves, even if only by ‘crude expression, poor meaning and ‘brutish language’, but in his opinion, only Arabic speakers are truly proficient in bayān, while a group of ‘foreigners’ (here he means the Persians) also had some, though lesser, expertise. The ‘four noteworthy peoples’ (madhkūrūn) of book producers, thus reduce to at most two (more likely one-and-a-half) when the secondary hurdle of bayān is erected before them.

The practical effects of this were far reaching. Speakers of imperfect languages, according to al-Ġāḥīz’s logic, necessarily possess imperfect knowledge: their expressions cannot accurately articulate what they intend to say. Hence al-Ġāḥīz attributed ‘errors’ of Christian theology (i.e. where Christian dogma differed from Islamic) to Rūmī linguistic deficiencies which prevented the accurate conveyance of the teachings of Jesus. In contrast, al-Ġāḥīz believed Arabic speaking theologians were better protected from theological error by the clarity of the Arabic language. The addition of the linguistic parameter in judging knowledge starkly handicaps non-Arabic speaking peoples and enables al-Ġāḥīz to acknowledge their literary heritage while maintaining that their books lack the fundamental linguistic component of the kitāb muḥkam mutqan, which he believed only Arabic could truly produce, and so justifying his negative opinions of non-Arabic books

---

152 Bayān, 3: 12–13: ḥattā inna l-Zanġa ma’a l-ḡaṭārat... lt-tuṭṭa l-ḥuṭṭab... wa-in kānat ma ‘ānīhā aḡfā wa-aḡlaza wa-ālṣūzhā aḥṭala wa-aḡhala.

153 Al-Ġāḥīz does not specify particular foreign groups in his, stating: ‘with [bayān] the Arabs are duly proud and with bayān some of the ‘Aḡam claim precedence’ (wa-bi-ḏālīka [al-bayān] tafṣīḥrat al-‘Arabu wa-taḏādalat aṣnāfū l-‘Aḡam, Bayān, 1: 75). Later on he specifies that the Persians are the other group who maintained an acceptable standard of bayān, although this is expressly inferior to the Arabic (Bayān, 3: 27–9).

154 See Rasā’il, 3: 334 (al-Radd ʿalā l-Naṣārā).

155 Ibid., 337. Al-Ġāḥīz did concede, alluding probably to the kalām debate in his own society, that not all Arab scholars understand the most complex points of theology because even the bayān of Arabic, as written by humans, can fall short of conveying such complex ‘ilm. This, however, was not, for al-Ġāḥīz, a weakness of Arabic, but rather, a warning to scholars of the almost certain failure that will befall theological speculation in any other tongue.
Arabians and al-Ḡāḥīz’s emphasis on Bayān

While later medieval commentators attributed al-Ḡāḥīz’s partisanship of the Arabic language to his defence of the Qurʾān, and while very similar arguments for the primacy of Arabic among world languages would appear in the iʿgāz al-Qurʾān genre\(^\text{156}\), this is unlikely the only or indeed primary reason for al-Ḡāḥīz’s stance. *Al-Bayān wa-l-tabyīn* does not particularly defend the Qurʾān – perhaps he felt it could handle such matters itself\(^\text{157}\) – but instead, as noted by Pellat in ‘Djāḥīz et la littérature comparée’ and Behzadi in *Sprache und Verstehen*, it marshals arguments for a cultural defence of the Arabs. Indeed, as Behzadi argues, al-Ḡāḥīz utilised bayān for deeper purposes than merely asserting Arabian superiority, but he certainly found bayān a very useful tool in šuʿūbī arguments, and, if we consider how his conceptions of bayān and the Arabians fit into the context of books, we can see how the pro-Arabian foundation of al-Ḡāḥīz’s bayān is in fact paramount. The *Kitāb al-ʿaṣā* (The Book of the Stick), the most expressly pro-Arabian tract in *al-Bayān wa-l-tabyīn*, ‘also contains some of al-Ḡāḥīz’s most detailed statements on both books and bayān. Indeed, the precise way in which his conception of bayān interacts with writerly culture and the cultural defence of the Arabians seems a good indication that these debates were intimately related. \(^{32}\)Abbāsid scholars believed that the Arabians lacked a ‘book culture’ in pre-Islamic times,\(^{32}\) yet these ‘bookless’ Arabians

\(^{156}\) The study of the inimitability of the Qurʾān. See the defence of the Qurʾān by al-Bāqillānī (d. 403/1013) which utilises the same linguistic arguments as al-Ḡāḥīz and al-Bāqillānī similarly dismisses the merits of foreign languages and their books (*Iʿgāz al-Qurʾān*, 29–32). The opinion of al-Ḡūrgānī regarding al-Ḡāḥīz and defence of the Qurʾān is discussed by L. Behzadi, ‘Al-Ḡāḥīz and his Successors’, 129–30.

\(^{157}\) He does expressly note the superiority of the Qurʾān’s language which constitutes evidence of its Divinity (*Bayān*, 1: 383), but a purposeful linguistic defence of the Qurʾān is not expressed as a primary concern of *al-Bayān wa-l-tabyīn* as it would become in the later iʿgāz al-Qurʾān books of the 4th and 5th centuries.

\(^{158}\) Much has been made in Western scholarship of certain references to writing materials in pre-Islamic poetry and the odd treaty which the Islamic tradition informs us was ‘written’. These oft repeated references concerning literacy in pre-Islamic times have overshadowed the lack of any admission, rightly or wrongly, by ‘Abbāsid scholars of the existence of significant literacy in pre-Islamic Arabia. See, for example, Ibn Qutayba’s *Kitāb Faḍl al-ʿArab wa-l-tanbih ‘ala ʿulūmihā* (Virtue of the Arabs and an Explication on their Sciences) where he lists the major fields of pre-Islamic *ʿilm*. Writing is absent, the closest is a description of ḥatt defined as divination via making lines in the
under the flag of Islam conquered ancient and learned civilisations. The incongruity of the ratio between Arabian military strength and their literacy would become problematic as the ‘book’ began to be culturally revered in the maturing writerly environment of the 3rd/9th century. When the parameters for esteem and power no longer rested on the force of arms alone, the descendants of the ‘literate’ Persians, Greeks and Indians could marshal the new ‘bookish’ benchmarks to claim their heritage was superior to the Arabs whose lack of an ancient literary tradition became an obvious source of embarrassment.

By stressing the dual intellectual and linguistic foundation of the ‘praiseworthy book’, and by focusing on the importance of bayān in underwriting ʿilm, al-Ğāḥīz articulated a firm argument for a non-bookish conception of ʿilm. He pursued this reasoning and defined the ideal bayān as epitomised in spontaneous good speech (ḥadīḥa, irtīğāl) – the attributes of skilled orators; while chiding the studied affectation (takalluf) of written language. He thus ventured that the best language actually has no need for books and so deftly parried any cultural disgrace attaching to the ‘bookless’ pre-Islamic Arabians: their lack of a literate tradition was transformed into a cultural strength. Al-Ğāḥīz frequently cited the above conception of bayān to laud the Arabs and maintained that their eloquent speech was an inborn virtue, a linguistic genius born from their desert environment, while he expressly denigrated the retrograde language of urban dwellers. In sum, the non-book-producing Arabians emerge at the summit of knowledgeable peoples for their lack of books was more than compensated by their excellent bayān. Al-Ğāḥīz could cogently demonstrate that their ʿilm was an ʿilm of the most useful order, expressed, as it was, in what al-Ğāḥīz deemed the most eloquent language. Simultaneously, the conquered non-Arabs and sand (Fadl, 143). Ḥattāt in pre-Islamic lore meant this sort of diviner, not the modern concept of a calligrapher (ibid.)!

159 Military power was, by the 3rd/9th century, considered the preserve of the Turks whom al-Ğāḥīz noted for their martial abilities (cf. his Manāqib al-Turk), but this did not elevate them to the tier of ‘noteworthy peoples’.

160 Bayān, 3: 28.

161 Ibid.

162 Al-Ğāḥīz commonly alludes to the linguistic eloquence of the Bedouin over the city dweller (Bayān, 1: 13, 96–7), noting that ‘city eloquence’ is learned in any event and lacks the innate accuracy of the Bedouin (ibid., 145) and he specifically notes the corrupting influence of city language (ifsād), which he admits even affects his own language and the ʿAbbāsid scholarly community (ibid., 162–3).
their book culture were structurally subordinated. Interestingly, al-Bayān wa-l-tabyīn is also silent on the translation project undertaken by the ʿAbbāsid caliphs, particularly al-Maʾmūn, a figure traditionally considered its prime architect.\(^{163}\) Al-Ǧāḥīz dedicated a book to al-Maʾmūn which was apparently well received,\(^{164}\) but al-Ǧāḥīz’s writings are devoid of praise for the caliph’s interest in foreign books, instead his praise for al-Maʾmūn, is on ‘Arabic’ grounds – concerning the caliph’s eloquence.\(^{165}\)

Al-Ǧāḥīz’s maintenance of this linguistic underpinning of ʿilm and support for the Arabians led him, somewhat unusually for an ʿAbbāsid writer, to express strong admiration for the Umayyads. When al-Ǧāḥīz enumerates Arab rulers who displayed proficiency in bayān, he emphasises the Umayyads (Muʿāwiya, Yazīd, al-Walīd and Sulaymān) as well their Arabian rival, Ibn Zubayr, whereas the ʿAbbāsid caliphs are expressly secondary.\(^{166}\) Furthermore, despite the ʿAbbāsid interest in book learning, al-Ǧāḥīz even commends the Umayyads for maintaining the linguistic and cultural traditions of the pre-Islamic Arabians and laments that the ʿAbbāsids eschewed what al-Ǧāḥīz considered the more virtuous Arabian orality as they turned instead towards the urban writerly culture.\(^{167}\) Can this be taken as an indirect slight on the ʿAbbāsids for too eagerly adopting the writerly culture and manners of the Persian state secretaries?

**Conclusion**

Al-Ǧāḥīz’s disparate opinions of books, ethnicities and learning merge under the umbrella of his theories about the human intellectual heritage. As a member of the burgeoning writerly culture of Iraq and reader of

---

\(^{163}\) For example, Ibn al-Nadīm some 125 years after al-Ǧāḥīz’s death recounts the portentous dream of al-Maʾmūn in which the caliph had a vision of Aristotle who urged him to find Greek books for translation (Fihrist, 303–4).

\(^{164}\) Al-Maʾmūn’s praise for the quality of this book is reported by al-Ǧāḥīz (Bayān, 3: 374).

\(^{165}\) See Bayān, 1: 91, 115, 3: 374–8. Al-Maʾmūn’s opinions about good books, containing excellent meaning and language together is also cited by al-Ǧāḥīz, but this concerns his interest primarily in Arabic books. See Rasāʿil, 1: 351 (al-Radd ʿalā l-Naṣarā).

\(^{166}\) Bayān, 1: 383. He expressly notes that the speech of Arab rulers other than the Umayyad era figures mentioned lacked what could be considered proper bayān, thereby placing the ʿAbbāsids in a secondary role. al-Maʾmūn is mentioned as an outstanding ʿAbbāsid, however no mention is made of his interest in translating foreign books.

\(^{167}\) Bayān, 3: 366.
translations from non-Arabic sources, he accepted books as valid transmitters of ‘ʿilm and theorised a structure of knowledge transmission via books in which the translation project and the foundations of ‘Abbāsid adab culture could be legitimised. So, in al-Ḥayawān in particular, al-Ḡāḥiz appears as the bibliophilic humanist and icon of the cosmopolitan book consuming medieval Muslim civilisation. But this bibliocentric worldview risked an implicit denigration of the bookless Arabians in the ethno-cultural debates of al-Ḡāḥiz’s intellectual milieu. To bolster the status of the Arabians in the story of human intellectual heritage, al-Ḡāḥiz played to their strengths, and found in his conception of ʿayān a cogent means to establish the parameters of ‘ʿilm around good language which he argued was the preserve of the Arabians.

In 3rd/9th-century Iraq, books by no means dominated the process of knowledge acquisition, and communication retained an oral/aural aspect. This background played into al-Ḡāḥiz’s hands, permitting him to refrain from unequivocally praising all written texts as authoritative sources of knowledge and to stress the importance of appropriately expressive language in the parameters of the ‘praiseworthy book’. While he accepted that some books could be veritable paragons of cultured thought, not all books are equal, and he wielded this re-conceptualised ‘ideal book’ against the very cultures that based their own superiority on ‘book culture’. Construing books in this fashion had another self-serving angle, as his theory implicitly assures that books written in Arabic (such as his own), must be the very best for all time.

Al-Ḡāḥiz’s dilemma of lauding book culture as legitimator of adab, and disparaging books to defend the Arabian heritage continued to confront later writers. In the mature writerly culture and on account of their own esteem of books, some would adopt an unambiguously bibliocentric lens to appraise the world, scorning not the non-believing kāfir but instead illiterates, and they even laud the polytheistic Babylonians and Pharaonic Egyptians as praiseworthy peoples on account of their perceived book production. But other later scholars would retreat into Arabian particularism, particularly in defence of the Qurʾān. Later cosmopolitan bibliophilia would thus continue to be cleft by issues of language and theology.

---

168 See Enderwitz and Saliba for recent spirited arguments for a synthesising and cosmopolitan al-Ḡāḥiz. Ch. Pellat (The Life and Works, 12) gives more weight to al-Ḡāḥiz’s polemical and pro-Arab, pro-Islam stance, but also indicates that the cosmopolitan spirit of adab tempered this to some extent.

169 See Ṣāʿīd al-Andalusī’s Ṭabaqāt al-umam for a paradigmatic example of
Al-Ḡāḥiz was unequivocally a bibliophile, but in his particular Ṣāḥiḥian way. I suspect his bibliophilia was at its most effusive when he assessed his own books: while he respected non-Arabic books as sources of knowledge upon which he believed his 3rd/9th-century Muslim civilisation was founded, he probably loved his own writings best. Al-Ḡāḥiz’s theoretical framework enabled him to borrow from foreign ʿilm without having to ‘pay’ for it by expressing respect for their cultures, since their languages were structurally subordinated. Al-Ḡāḥiz could thus comfortably extol the virtue of books and write books to his heart’s content, confident that he would never have to concede that Aristotle, Bozorgmehr or Ibn al-Muqaffa’ could possibly be his equals.
